

Strain Equivalence Statement

Document ref.: VerisQ-EQS-NCTC13227 | Issue date: 01 May 2026 | Revision: 01

1. Subject

This statement confirms the equivalence of *Burkholderia cenocepacia* NCTC 13227 supplied by LotusTech under the brand VerisQ™ to the corresponding ATCC reference strain, for the purpose of **non-therapeutic pharmaceutical quality control testing** under USP, EP and JP general chapters.

2. Strain identification

Organism	<i>Burkholderia cenocepacia</i>
UKHSA catalogue no.	NCTC 13227
ATCC equivalent	ATCC BAA-245 (strain J2315)
WDCM identifier	—
Other equivalent collections	= LMG 16656 = DSM 16553 = CIP 108255 = CCM 4899 = CCUG 48434

3. Pharmacopoeial citations

United States Pharmacopeia	USP <60>
European Pharmacopoeia	EP 2.6.13 (<i>Burkholderia cepacia</i> complex testing)
Japanese Pharmacopoeia	—
Indicated QC use	<i>Burkholderia cepacia</i> complex (BCC) panel test strain; growth promotion of BCSA; method suitability for non-sterile aqueous pharmaceutical products under USP <60>.

4. Statement of equivalence

The strain *Burkholderia cenocepacia* NCTC 13227 supplied by LotusTech is sourced directly from the UK Health Security Agency Culture Collections (UKHSA — NCTC / NCPF, Porton Down, UK). Through documented pedigree, identical phenotypic and genotypic characteristics, and a common WDCM identifier where applicable, this strain is recognised internationally as equivalent to **ATCC BAA-245 (strain J2315)**. Pharmacopoeia users may therefore rely on this strain to satisfy general chapters that specify the corresponding ATCC catalogue number, in accordance with the “or strains shown to be equivalent” allowance in USP <60> / <61> / <62> / <71>, EP 5.1.3, and equivalent JP provisions.

5. Source and traceability

Material is supplied under the Material Licence Agreement BE25 009 between UK Health Security Agency (UKHSA, acting through its Culture Collections) and LotusTech Pty Ltd. Each batch is released with a Certificate of Analysis (CoA) bearing the original UKHSA accession data, the passage number from the master seed lot, and a traceable batch

identifier. Strains are supplied as freeze-dried (lyophilised) ampoules and are released no further than the 5th passage from the master seed lot, in line with USP <1117>, EP 5.1.3 and JP General Information.

6. Limitations of use

The strain is supplied for non-therapeutic pharmaceutical quality control testing only. It is not intended for therapeutic, diagnostic, in-vivo, or human/animal-clinical use, nor for the manufacture of any product administered to humans or animals. Onward transfer or re-distribution of viable material to third parties is prohibited under the terms of BE25 009.

7. Authorisation

This statement is issued under the authority of LotusTech Pty Ltd (Quality Assurance / Regulatory Affairs). The presence of the corporate stamp below constitutes formal authorisation; no manual signature is required.
